We Recommend that in filling up your order selected from this and the following nine pages, you at the same time order other goods selected from this catalog, so that the goods may be all packed together and go in one shipment, as the freight on 50 to 100 pounds would cost you no more than the freight on 10 pounds. You would then receive the benefit of the same freight rate as the dealer in your home town.

OUR FACTORIES"

SOME OF THEM WE OWN OUTRIGHT, SOME OF THEM WE OWN IN PART AND OF OTHERS WE CONTROL THE PRODUCT

THESE illustrations are intended to give you an idea of our principal factories. They cannot, of course, convey more than a very faint impression of the combined manufacturing and financial strength represented by these various institutions. Many of them are factories that cover many acres of ground; for example, the stove plant is the very largest stove foundry in all the world. Many of our factories are leaders not only in size but in the reputation of their output.

We cannot show a picture of every factory that supplies us with merchandise—these number into the thousands and would cover many pages of space. We show here just a few in which we wield a controlling influence—we call them our factories because some of them are owned outright by us and in others we own a controlling interest and in still others we contract for the entire output. Our object in controlling these factories is to give our customers the benefit of the lowest possible manufacturing cost with one profit added instead of the usual three or four.

The enormous investments we have made in manufacturing have but one object—to accomplish ECONOMY and QUALITY for our customers on all items where such things can be accomplished to better advantage by ourselves.

To get the right quality and the right cost on thousands of items we have gone to the very bottom of the source of supply in manufacturing and raw materials. We have investigated every point connected with the manufacture and marketing of merchandise that could possibly be of benefit to our customers. Every advantage that could be gained by the investment of capital and the employment of experts has been secured for just two purposes—to give our customers better quality than they could get elsewhere—to give our customers lower prices than any other house can quote.

Terms and How to Order

We require cash with orders. See paragraph about how to send money.

Use our regular order blank if you have one; if not, use any paper.

Always keep a supply of our order blanks on hand. It is more convenient to make your order out on one of them than in any other way. If out of them at any time, write us a postal card and we will send you some.

Always sign your full name (Christian name and surname).

Please write your name and address very plainly.

Give your postoffice, county and state. If you have a local address, such as rural route or street and number, or postoffice box number, be sure to give it.

If your shipping point is different from your postoffice, be sure to mention the shipping point as well as the postoffice.

How to Send Money

You can send money by postoffice money order, express money order, bank draft, cash by registered letter, or stamps. If you send postage stamps, fold them in waxed paper so that they cannot stick together. Stamps stuck together are worthless and will be returned. The best way to send money is by postoffice or express money order. They cost very little and they are safe, because if a postoffice or express money order is lost you can always have a duplicate issued to you.

If you have a checking account at a bank, you may, if you prefer, send us your personal check.

If you live on a rural route, you can give your letter and money to your rural carrier and he can buy a money order for you at the postoffice and enclose it in the envelope with your order and mail it to us That will save you going to the postoffice.

Methods of Shipment

All transportation charges are to be paid by the customer.

If you do not specify how goods are to be shipped, but leave the shipping of your order to our judgment, we will in all cases ship your goods by whatever method will cost you the least money.

In the following paragraphs we fully explain the various details about mail, express and freight shipments.

Weight of Shipments

Shipping weight in our descriptions means the weight of the article packed for shipment by itself. You can therefore figure the amount of postage you will be required to send us at the rate of 1 **cent an ounce if you want a mail shipment;** or (on the larger items) what the express or freight charges will be if these items are to be shipped by themselves. Of course, if you are making up an order to be shipped by freight, combining a number of these items, your shipment would not weigh as much as these combined shipping weights, for if they are packed together, much of the separate wrapping is unnecessary. In many cases, however, we quote only **actual weight** with no allowance for packing; particularly where actual weight partly indicates value and on goods not suitable for shipment by themselves.

Mail Shipments

On all orders to be shipped by mail we require the full amount of cash with the order, together with **sufficient money extra to pay postage.** If you want goods shipped by insured mail, enclose insurance fee. If you want the package shipped by registered mail, enclose registration fee.

SECTION 1. OPEN MAIL. So called because only the regular merchandise rate of postage (**1 cent per ounce**) is required. Open mail shipments are forwarded at customer's risk. The government is not responsible for packages lost if shipped by open mail.

SECTION 2. INSURED MAIL. If, in addition to sending us the regular postage rate of **1 cent an ounce** on any orders you wish shipped by mail, you include also on orders up to $5.00 in value **5 cents per order extra,** and on orders of over $5.00 and under $10.00 in value **10 cents per order extra,** and on orders of more than $10.00 in value 5 cents for each additional $5.00 we will guarantee the safe arrival of the entire shipment.

SECTION 3. REGISTERED MAIL. So called because the postoffice department keeps a record of each shipment sent by registered mail from the time it is delivered to them by us until they deliver it to you. This is a good method of forwarding shipments of jewelry or other small valuable articles exceeding $10.00 in value. The rate of postage on registered mail is **1 cent per ounce** and **in addition 10 cents for registration** on each package so shipped.

Single packages weighing more than 4 pounds cannot be shipped by mail, but any number of packages weighing 4 pounds or less each may be shipped to the same person at the same time. **Any book, no matter what its weight, can be sent by mail. Postage on books and printed matter is ½ cent per ounce.**

Liquids over 4 ounces in weight cannot be shipped by mail, but liquids weighing less than 4 ounces may safely be shipped by mail.

Explosives, poisonous or inflammable articles cannot be sent by mail under any circumstances whatever.

SECTION 4. Watches, jewelry and other valuable merchandise of light weight make profitable mail shipments and if you are not ordering other goods at the same time, it is most economical to have such goods sent by mail. **Do not order shipped by mail articles of small value and considerable weight,** as the postage in many cases would be more than the value of the goods.

How to Figure Express Charges. See Page 13.

Express Shipments

Shipping goods by express is an absolutely safe method of transportation and is good, quick service. It is, as a rule, the most profitable method of shipping goods weighing less than 20 pounds.

Always call for your goods promptly when the express agent notifies you that they have come.

If you have no agent at your station, all express shipments will be carried to the town nearest you which has an agent. If there is no agent at your station and you want the goods shipped by express, always tell us what station to ship them to.

We make separate express shipments of certain light and expensive articles, such as watches, jewelry and high priced revolvers, when they are ordered shipped with a miscellaneous freight or express order. We send them by what is called "Sealed Express" in a package by themselves for greater safety.

For Freight Classification and Freight
Page 13.

Freight Shipments

Freight is the preferable me ment for all heavy, bulky mercha agricultural implements, househo niture, groceries, hardware, etc.

When a shipment weighs m pounds, the railroad companies charge only for the actual num at the regular rate per 100 pounc. For instance, if the pounds to your town should be 40 cents, a box weighing 125 cost 50 cents freight charges. Freight charges amount to any kind of a shipment in comparison with the saving you extremely low prices, but it is well to keep the freight rates ordering, because **railroad companies usually charge no mor 100 pounds than they do for 20 pounds,** so that in case yo small order and want it to come by freight, you could hav buy goods at the same time, send his order with yours a orders shipped in your name by freight, and if both orders than 100 pounds they would cost no more than either one would if it were shipped separately.

If you have no agent at your shipping point, freight ch prepaid from here, and if you do not know what these freigh amount to be sure to send enough money extra to cover send more than the amount we need to prepay the charge once return you any balance.

If you have an agent at your station, it is not necess charges. In fact, it is better not to have them prepaid, as t exactly the same no matter whether you pay them or we pa

Factory Shipments

In order to make our prices as we find it necessary to ship many bulky articles that we sell, direct tory where they are made, thus sa tomers freight and cartage to Chic and other expenses incidental to passing through our house.

The freight from the factory to the customer's town is f than if the goods were shipped from Chicago, because the fa located nearer the customer's town than Chicago.

The descriptions tell you if goods are from factory. Of course, the most of ou is shipped from our house in Chicago.

Be sure to come and see us when you are in Chicago. We want to show you through our great buildings. Any street car or elevated railroad conductor will direct you to our plant.

Club Orders

Railroa as a rul much for pounds o one shipment as they would for 100 po quently, it is a good plan, if you only sized order which you wish shipped, friends or neighbors to join, or club in make up an order and have them all and shipped out together to one person, each member of the party his proper goods. By doing this, you see, you co or five 20 or 25-pound shipments go fo same freight rates as one shipment of 2

How to Return Goods

If yo necessar goods t reason, tell us ble is, advise send th

Be sure to send back with your lette well as any other papers you may have order.

When you return goods to us, either by mail, express sure to address the package, box or tag plainly to us and to write your own name and address plainly on the packag so that we will know who the sender is. **Also be sure to w number on the package.**

Never return goods by express if the package weighs pounds, as it will be cheaper to send it by freight.

Do not seal a mail package, but wrap it in such a manner master can open it and examine it without destroying the not make the mistake of pasting stamps over the string of merchandise which you are sending by mail, because that i sealing it and will cost you double postage.

Do not fail to register mail packages worth $2.00 or mor can be registered for 10 cents, and if it does not reach us pr be traced.

Do not return any article shipped from a factory withou us, because you would not be able to know otherwise wheth it sent to Chicago or back to the factory.

C. O. D. Shipments

We have practically discontir goods C. O. D., because nearly all who formerly had goods shipped send cash in full with their order the annoyance of going to a bank office to pay the balance due ment, and also saving the cost of money to us. Still, if for any reason a customer would pre examine goods before paying for them in full, we will make ment upon receipt of a sufficient deposit, usually about one amount of the order. We will not, however, accept any shipped C. O. D. if it amounts to less than $5.00, becau amounts smaller than this are unprofitable to the custome charge for collection and return of the money.

Goods shipped by express C. O. D. are always subject t in the express office. If they are satisfactory in every res the agent the balance and the express charges and charge for money and take the goods.

We cannot guarantee the privilege of examination on C. O. D. by freight, because many railroads give their agent to not allow any packages to be opened until after the char paid.

Classification of Merchandise for Freight Shipments.

You will notice in the Freight Rate Tables below there are four different rates quoted to each city, **first class, second class, third class** and **fourth class.** This is because the railroad companies base their rates on the kind of merchandise to be carried. In order, therefore, to give you an idea as to the rate which any kind of merchandise will take to your nearest city, we tell you here the kind of merchandise which takes the different classes of rates.

FIRST CLASS—Bath tubs, baby carriages, dry goods, carpets, curtains, matting, oilcloth, rugs, etc.; books, stationery, boots and shoes, wagon wheels, Morris chairs, cigars, couches, cream separators, dressers, desks, etc.; drugs, electrical goods, fire arms, graphophones, harness and saddlery, incubators, lamps, notions, pianos and organs, pictures, rubber goods, sporting goods, tinware, toys, furniture (most kinds), trunks, valises, farm wagons, clocks, clothing, tents, washing machines.

SECOND CLASS—Hardware, granite ware, plumbing material, glassware, refrigerators, loaded gun shells, extension tables, vacuum cleaners, tools, animal traps, wall paper, crockery, cement block machines, woodenware, bedsteads.

THIRD CLASS—Church, school and farm bells, farm implements, windmills and towers, mill work, stoves and ranges, iron safes, wire fencing, iron pots and kettles.

FOURTH CLASS—Anvils, most all kinds of groceries, felt and tarred roofing, galvanized iron, steel roofing, steel siding.

How to Save Money on Freight Charges.

In having goods shipped by freight, it pays you to make up an order of 100 pounds or more, because railroad companies usually charge as much for a shipment weighing less than 100 pounds as they do for one weighing 100 pounds. It is well, therefore, when mailing us an order to be shipped by freight to observe how much it will weigh, and if not at least 100 pounds, a number of items can be added without increasing the freight charges, and thus a larger saving effected.

When You Leave the Method of Shipment to Us.

When you leave the method of shipment to us we always choose the cheapest method. However, if your shipment is comparatively small (generally speaking, less than 20 pounds), and you want it to arrive in the quickest possible time, it will be well to specify **express** on your order, as express shipments can be delivered much quicker than freight shipments. Small packages of light weight (not more than 4 pounds) and of considerable value can be profitably and quickly shipped by mail, but in case you want any goods shipped by mail you must be sure to mention it and include with your order **postage extra at the rate of 1 cent an ounce,** according to shipping weight stated in the description or according to the postage stated.

HOW TO FIGURE EXPRESS CHARGES.

First estimate the weight of goods you are ordering; then find the rate per 100 pounds by express to your nearest city in the Table of Rates below; then consult the following Scale of Express Charges, following the line for the weight of your goods to the column headed by your express rate per hundred pounds and the amount shown will be the express charges.

If the exact rate per hundred pounds is not shown in any of the headings of this scale, take the next highest rate shown and the express charges will be about the same as to your town.

WE MANUFACTURE the most up to date and highest grade wall offer it to you at the lowest prices ever known. Our paper ste cially manufactured according to specifications furnished by experts and comes direct to our own wall paper mill from t largest paper producers. It is carefully examined and tested for fiber, qual thickness. The grinding of wall paper colors, an art in itself, is carried on eyes of our superintendent, to insure not only the most perfect effects in t but to secure permanence and durability in the paper. We keep our style terns up to date by securing the latest designs and newest ideas from the leading authority on interior decoration. We have a staff of skilled artists at our disposal at all times who are constantly working out new effects and we always have a large number of excellent designs and patt which to make our choice. This season we show a number of patterns prize designs; we offered large money prizes to artists in this and in for tries for the best wall paper designs for various rooms with the result tha paper judges had to devote a considerable length of time to decide o patterns from hundreds of drawings submitted. All of the winning priz are shown in our free wall paper sample books and you will marvel at the we ask. Our machinery and entire factory equipment are of the very latest nothing that could improve the quality of our wall paper or reduce the expense of manufacturing it has been omitted.

Our wall paper is loaded into cars on our own private switch trac at the doors of our wall paper mill, giving us wonderful economy and spee ping. When you consider why our prices are lower than the prices c dealers, all of these points must be taken into consideration; all of these a of manufacture and advantages of marketing combine to give us the p position we hold in the wall paper field. Our prices are different because ness methods are different. When you buy wall paper from us your sav difference between our one small percentage of profit and the five or six p you, the user of the wall paper, must pay when you purchase from other houses or firms who do not manufacture the paper they sell; remembe purchasing from us you get brand new up to date wall paper, not an old paper that has been stored with the jobber or wholesaler until it is out of fashion. We are positively the only ho country selling merchandise by mail who manufacture the paper they sell and own outright a complete and up to paper manufacturing plant.

The manufacture of wall paper has always been one of the most profitable lines of business in existence. We there could be a manufacturing industry in which we could operate with greater advantage to our customers than in paper line. Restricted to a few manufacturers overloaded with unnecessary selling expenses and exorbitant profits, paper business offered one of the greatest opportunities of our entire business career for the application of our we principles of merchandising—**our policy of eliminating all middlemen's profits and selling directly to the user of t with only one small profit added to** the lowest manufacturing cost. The percentage of profit you pay varies the different lines of goods you purchase. Some lines yield the maker a very small profit because of free and widespread competition, because many different concerns are making similar goods and all want a share of the business and each maker finds that he can get his share of business only by voluntarily reducing his profits. Other lines of goods are entirely monopolized by one or only a few manufacturers. Either the raw materials are exclusively controlled by a few, or the facilities for manufacturing and marketing are restricted in such a way that just competition is impossible and the result is that the public must pay exorbitant profits. In these lines, where competition does not exist, where prices are controlled by trusts, by manufacturers' agreements made to increase profits, the interests of the buying public are entirely ignored, the maker's sole aim being to realize great profits quickly and without regard for the future. **Our customers know that we have brought wall paper of highest quality and most modern design within the reach of every family in the country.** We have weeded out the unnecessary expenses and exorbitant profits. In our own wall paper mill in Chicago where the most improved multicolor wall paper machines ever built are running night and day turning out thousands of rolls of wall paper every twenty-four hours, we have solved the problem of high grade wall paper at low prices. We have solved the problem in the simplest way possible—by going out into the markets independently for our raw materials and by **paying no profits to jobbers or middlemen of any sort.**

The above illustration represents our wall paper mill, located right here in Chicago. This mill is equip greatest labor saving and money saving devices known. Our multicolor wall paper presses are of the la improved patterns, which enables us to print more paper, and print it better, in a shorter time than if we used machines. Everything possible has been done to improve the quality and bring down the cost of manufacturin give YOU the benefit of the lowest prices for high grade papers known in wall paper history.

This illustration represents a section of the Scotch mill making for us the fine Tablecloths and Napkins shown on this page and referred to as of Scotch manufacture. While we do not own this mill, nevertheless we control a certain number of looms therein (and a considerable number at that) running from January 1st to December 31st on our goods. This mill is noted for the rich character of the linens it turns out, and regardless of market conditions it never varies its product. In the foreground can be seen the wide damask looms weaving these large size tablecloths. Many of the employes of this mill have been engaged in this work for a great number of years, in fact, one of those in the photograph has been with the firm fifty-four years.

Square Tablecloths With Round Patterns, Woven Specially for Round Table Use, $3.43 to $5.67. Napkins to Match, $4.93.

From time immemorial the human race has been taught to look upon the use of fine linens as the highest mark of richness and elegance. Everyone has read of the far Eastern kings who always "went in purple and fine linens." Conditions have not changed greatly in this respect, fine linens still being a mark of refinement as they were centuries ago. The only difference is they are now accessible to the multitudes, whereas in ancient times none but the high in rank were able to secure them. At the low prices we are making on these most stylish and durable linens their everyday use becomes a real economy. We have actually taken choice linens out of the class of luxuries. The two illustrations shown on the left represent our ribbon pattern and our rose design, of which we show a half section, two especially good things in circular patterns for round tables. These tablecloths are woven of the most carefully selected flax, beautifully designed, heavy weight and warranted full double damask. The richness of the patterns is something that must be seen in order to be appreciated. We can furnish three sizes, all the same quality, differing only in size. In order to secure the greatest benefit from these quotations we would suggest that you order tablecloths and napkins together; nevertheless to those who desire it we will furnish either tablecloths or napkins separately.

No. 36F1372 Another very valuable addition to our range of fancy linens this season is this stylish Scalloped Tray Cloth. Measures about 16x24 inches. In addition to the handsome scalloping of this cloth it is additionally decorated with artistically openworked center. The damask center patterns are very rich in outline, and as the cloth is of above medium weight, woven of very carefully selected flax and bleached pure white, the patterns are reflected charmingly. Large city stores usually get 50 cents each for these tray cloths and at that price they are considered good value. We would be compelled to ask much more than we do if we did not import them direct ourselves. Price, each....**30c**

This photograph shows a section of one of the mills where several of the plain linen fabrics shown on this page are made. This scene illustrates an operation known as yarn winding and from long experience the fingers of these operatives become very skillful. When it is taken into consideration that in many of the cloths woven for us, as many as ten to twelve thousand individual ends go into the cloth, some idea may be obtained of the complicated nature of the linen weaving industry. Every thread has its own particular duty to perform and the breaking of a single thread if allowed to go unnoticed would be the means of spoiling probably several yards of fine linen. By the employment of none but the best operatives and the installation of every known device for promoting their health and comfort, our manufacturers have secured the highest class of product.

It is also a good cloth for suits and, on account of its extra width, cuts to unusual advantage. The usual 2½-yard width. Actual width, about 88 inches.

No. 36F3190 This number represents the very finest goods we carry in New and Stylish Dimities, with the exception of our Silk Dimities. Unusual skill has been displayed in the execution of the rich floral patterns and considerable time has been spent before a finisher was found who could produce the desired color effects. This is a dimity that you will not meet with ordinarily; if it were met with in the ordinary retail store would be found priced, no doubt, at 30 cents a yard. ABOUT 29 INCHES IN WIDTH. Besides being of unusual excellence in pattern it is also exceedingly durable, owing to the employment of such high class yarns. Colors, rose pink, light blue or lilac. In ordering state color. WONDERFUL MILL END VALUES

Look over this page of sensational bargains in genuine Mill Ends:

The term Mill Ends covers the short lengths left after cutting a "warp" (as the mill terms a full uncut web) into proper lengths for the wholesale trade.

All perfect goods and the lengths are very practical for everyday use.

As our stock of Mill Ends is constantly changing, we cannot guarantee to fill every number all through the season, though we shall try to do so. Should our stock of any of these Mill Ends become exhausted and we be unable to replace it, we shall omit the item from your order and you will not be charged for it. We hope to be able to fill all orders received, but these values are truly marvelous and we ask you to order early.

Golden Crown Knitting Yarns

These splendid yarns are made for us from the best quality of raw wool, carefully selected, properly spun, very elastic and lofty. You can have every confidence in our Golden Crown Brand of Knitting Yarns for there are none better. The weights we give in every instance are manufacturer's weights and are liable to be more or less than the avoirdupois pounds; this difference is caused by the change of weight after dyeing different colors; therefore, we cannot give you the exact weight in ounces. We give full measure according to the standard of yarn weights. Yarns are always sold in this manner. Our prices speak for themselves; no one sells as good a quality of yarn at so low a price.

HOW TO ORDER A CORSET.

Ordering corsets from us is very simple and bound to be satisfactory if you will just follow this simple rule in sending your measurements: Where you do not know your exact size, take your measure at the waist line over the corset which you are now wearing, and deduct 2 inches from the number of inches shown by the tape; this allows for the spread of lacing in the back. For example, if your waist measure is 23 inches over your corset, you should order corset size 21. Please do not apply this rule to a measure taken without your corset on.

SUPREME ROYAL CURL PLUMES

EXTRA SELECTED WIDEST STOCK.

These plumes stand for the finest qualities obtainable in ostrich feathers. They are made from the most carefully selected prime stock of the highest possible grade, being very wide with beautifully curved heavy heads. Their extreme width really entitles them to the name "Natural Willows." The new "Royal" style of curling, which produces the long drooping effect, is the particular feature of our "Supreme" quality. Taking the extra fine quality of these plumes into consideration, the prices quoted below are really wonderful bargains and represent a saving to you of almost one-half of the ordinary retail store prices.

A FEW FACTS ABOUT OUR FRENCH CURL PLUMES.

They Contain Only Hard Male Stock.

The width of the flue is quite generous and in good proportion to the length of the plume. They are most carefully dyed and curled.

One of these plumes will outwear three of the ordinary kind made of soft fluffy stock.

They are the easiest style of feathers with which to trim, as they lend themselves easily to almost any shape. They make a bigger showing on the hat because of their long sweeping effect.

Wearing an ostrich plume is the real test of its qualities. Looks are very deceiving; you should buy ostrich feathers from people in whom you have confidence.

In the price list on the opposite side of the page, you will find a saving of one-third over retail prices.

BEST QUALITY OSTRICH TIPS

ALWAYS IN GOOD STYLE, EASILY APPLIED.

Our three in a bunch Ostrich Tips are made of the same uniform high grade quality stock as used in all of our other lines of ostrich goods, a quality which will give the best of wear and satisfaction. Tips are in great demand for trimming turbans as well as all kinds of small shapes which will not carry a large plume. Only the head of the feather is used in the making up of the tip, length being of little consequence, as the chief point of value in any bunch of tips, next to the grade of feathers used, is the rich appearance given by the width. The better the tip, the wider and heavier the head. We recommend the better grade of goods, for the wider and fuller the plume or tip is the longer it will keep its rich appearance.

NOTE THE GREAT MONEY SAVING

INFORMATION ABOUT SIZES. UMBRELLAS come in three sizes, designated as 26, 28 and 30-inch. These sizes refer to the length of the ribs when closed. Allowing for curve in frame, we find that the actual spread of the different sizes is as follows: 26-inch spreads to about 40 inches, 28-inch spreads to about 44 inches, 30-inch spreads to about 48 inches. We quote ladies' umbrellas in 26-inch size only.

We Guarantee the Quality of Our Re
to Wear Suits and Dresses —

The ready to wear tailored suits offered on pages 133 to 138 and the dresses offered on pages 139 to 148 are guara be of the highest quality in style, material and fit. They are much superior in every way to the average ready to wear sold by cloak and department stores. This page explains how we select our fabrics and styles, and how we guarante workmanship and finish. It will pay you to read this page carefully, as we give the facts about ready to wear appar knowing and remembering, and show what you may expect to get in a ready to wear suit or dress purchased from u

How We Select Our Fabrics.

To insure that all fabrics in our ready to wear suits are of the right quality, we have woolen experts who devote their entire time to the selection and manufacturing of the various fabrics we use. We deal direct with the largest and best woolen weavers. Our patterns are selected from thousands submitted to us, thus insuring the very choicest colors and weaves of the season. Each fabric is woven according to quality specifications which specify the exact quality of the yarns, weight, dye and finish. In addition to this we have trained inspectors who examine and test every piece of cloth received from the mills to see that the quality is as specified and that there are no imperfections. Before using the cloth it is thoroughly shrunk by a process which absolutely removes all shrinking tendency. The same carefnl methods are used in the selection of our dress fabrics. The right quality is always guaranteed.

About the Workmanship and Finish

One great objection to the average ready to wear dresses is the fact that the workmanship and finish are no and perfect as in custom tailored garments. We have remo objection by setting the same high custom tailor workman finish quality standard for our ready to wear suits and Our workmanship and finish in them is as perfect as tha custom tailored garment. The best tailors, finishers an makers are employed. They work in large, light, airy, workrooms, the surroundings most conducive to the bes manship. All coats of tailored suits are built on a frame interlinings such as you would expect to find only in a tailored suit. The best quality trimmings are used. Parti tention is paid to all small details; for instance, all seams bound so that the inside of every garment has a clean finish.

How Our Styles Are Selected and Designed.

Style means everything to the woman who purchases a suit or dress. In order that our styles may represent the latest and best ideas, we have our own staff of expert fashion designers who select and design them. All new style ideas are in our possession the minute they appear at the style centers—New York and Paris. Our fashion plates portray a large variety of styles, all representing new ideas adapted and modified to meet the tastes and special requirements of the American woman. When purchasing your suit or dress from us, you are assured a correct and up to date style which is not extreme; in other words, your suit or dress will be stylish and at the same time it will not be out of style in a short time, which would happen if it were made in an extreme style.

Ordinary Store Methods and Our Methods of Fitting Comp

Why You Have Trouble in Being Fitted in Ready to Wear Suits Bought in Stores.

The reason is this: In making suits as most manufacturers do in only seven sizes—32, 34, 36, 38, 40, 42 and 44 inches bust measure—they go about it in this way: For a size 36 suit they select what is known as a medium 36 for a model; that is, a figure 5 feet 7 inches tall and 36 inches bust measure, and the suit is made to fit a woman of that size. Now suppose a woman 5 feet 3 inches tall and 36 inches bust measure wants a suit. It is easy to see that a size 36 suit made to fit a woman 5 feet 7 inches tall will be entirely too long in the sleeves, too long in the waist and too high in the neck to fit th woman. Still the short woman or tall woman who b at a retail store has no other choice except that of altered, at an additional expense of from $2.50 to then be compelled to accept the suit, which cannot factorily. Anyone who understands dressmaking kn if a sleeve is cut off at the bottom it ruins a gracefu it is cut off at the top it ruins the fit, and so on th whole garment. In other words, a suit to fit must fit, and not altered to fit. This is what our system d

Why We Can Fit You Perfectly Without Alterations

Our system of sizes is a new innovation. We make every suit in every size—32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43 and 44 inches bust measure, and we furnish (and this a most important feature) three proportions in each size, so that if you are short, tall or medium, in comparison with your bust measure, we can fit you. We furnish thirteen sizes and three proportions in each size, making thirty-nine sizes in all. The stores furnish only seven sizes, less than one-fifth the number of sizes we carry. We show you an illustration of a coat of three different proportions in one size, made to fit women of three proportions—short, medium and tall, as shown in the illustrations to the left. You will see at a glance that coats of the same size and proportions would not fit all three of the women perfectly. To insure a perfect fit the coats must be made to fit the particular proportions of each figure. That is why we make each size in three different proportions, and why we can guarantee a perfect fit without alterations. Give your height and weight, and your measurements as explained in the simple instructions on page 663 and we guarantee to fit you perfectly.

Price, $4.95

Average shipping weight of these dresses, 35 ounces.

We have made it a custom to reserve one page every season on which to offer some special feature, something out of the ordinary in style and value. Our customers have learned to expect and look forward to this page, knowing from experience that whatever we offer on it is well worth looking for. One customer writes: "I have purchased several of your special feature dresses and have always been pleased and delighted with the exceptional value received. I always look forward to your special feature offering, knowing that it offers something of exceptional style and quality, and enables me to secure nearly twice the value that I can secure at the stores at home or elsewhere for the same money." We receive many such complimentary letters from our customers, and they spur us on in our efforts to give our customers still better style, quality and values than before.

The Style and Quality Are Exquisite

These two dresses may be likened to the masterpieces of a painter. A painter may paint a dozen pictures, all of meritorious quality, but there are just one or two on which he puts his greatest and best efforts; one or two which will receive most of his time, thought and effort, and which when presented to the public are proclaimed masterpieces. Just so with the selection of these two dresses. Hundreds of designs were submitted and critically examined before these two styles were found. Hundreds of samples of laces and embroideries were examined before we found the right quality and the patterns best suited for the styles. In short, these are our masterpieces in value giving. From neck to hem they are so fine in style, material and workmanship that they cannot be duplicated anywhere at the prices. We are proud of them and offer them with the fullest confidence that after you have seen either of the dresses you will say that never have you seen a dress of such rare beauty and quality for the prices we ask.

Rusleen Petticoats

RUSTLE LIKE SILK

WE MAKE THEM
AND
MAKE THEM RIGHT

The many thousands of Rusleen Petticoats we sold during the past few years have given the very best of satisfaction. We use this cloth because we absolutely know the whole process of its construction; by whom it is made and how it is dyed and finished. While it costs us more today to have it manufactured than formerly, with our enormously increased sales in petticoats, together with the fact that our factories are much better equipped to turn out better work more economically, we have been able to save you money on the finished petticoats.

The prices of these petticoats are much lower than heretofore, and we feel certain that you will agree that the styles are much better.

Rusleen cloth is a special brand of our own, and cannot be bought elsewhere. We believe it is the best wearing petticoat fabric made in this country, and comes **NEARER IN LOOKS TO A TAFFETA SILK** than any other fabric we have seen.

With great pleasure and a feeling of pride we submit our complete outfits for baby. These outfits met with great success during the past season, but we have every reason to believe that we have improved them very much this season.

We wrote personal letters to over 200 mothers who had purchased our outfits, asking for their suggestions with a view to improving the standard of these outfits. We received a number of clever suggestions for which we are extremely thankful and which we have adopted.

WE NOW BELIEVE THESE FOUR OUTFITS TO BE UNEXCELLED.

44c Each — No. 16F6876 Mesh Weave Union Suits for Women.

One year ago this spring we offered in our catalog mesh weave underwear for women. It was a new idea in women's underwear. Realizing this, we made a statement to the effect that any of this underwear purchased from us not giving the best of satisfaction could be returned and we would exchange it for other underwear or other merchandise, or return your money. One year has gone, and though we have had a large sale for these goods not one of our customers has written us saying that they were not satisfied with this mesh weave union suit. The wonderful sale of this garment has enabled us to reduce its sale price from 59 to 44 cents each suit. The same guarantee holds this year as last, and we advise you to try this union suit, for it is the ideal garment for summer wear. It is a flat knit, pure white, finely woven garment, full of small holes. This permits circulation of air between the skin and garment, making it most comfortable for hot weather wear. Low cut neck and sleeveless armholes are daintily finished and inserted with a wide mercerized tape. The umbrella bottoms are cut wide and flaring, and are trimmed with torchon lace of a very pretty design. A beautifully finished union suit. Sizes, 4, 5 and 6, to fit bust measure from 32 to 40 inches. **Give size wanted.** Shipping weight, each suit, 10 ounces.

WHAT THEY SAY.

Amenia, N. Y.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I bought my first pair of Profile Shoes two years ago and have worn them for everyday work on a farm ever since. Have had them tapped three times and the uppers are still good. Will never buy any other kind of shoe as long as I can get the Profile.

H. B. KELLER.

We guarantee to replace any pair of Profile Shoes that does not wear one year, excepting the soles, which are the best that money can buy.

COBBLERS' OUTFIT $2

The Most Complete and Reliable Outfit You Can Buy

IT IS WASTING MONEY TO BUY AN INCOMPLETE OUTFIT, ONE THAT IS PRACTICALLY WORTHLESS WHEN IT COMES TO SERV

Our aim is not to give you an outfit containing the most articles for the smallest amount of money, but one which is better than any othe the market and cheap at the price, an outfit that both you and ourselves can be proud of.

Combination Shoe, Harness and Tinners' Outfit, $2.00

Before getting out this big high grade outfit, we purchased the best outfits advertised by other leading houses at $2.25 to $3.00, and we found the best outfit in the lot compared with our big $2.00 outfit about as follows:

OUR HAMMER is made of the best forged steel, the other outfit contained a worthless cast iron hammer costing 48 cents a dozen.

OUR KNIFE costs as much as two of the other knives.

OUR SOLDERING IRON is extra heavy, the other light and worthless.

OUR RIVETING MACHINE is high grade and practical, the other is almost worthless. We found the same comparison on almost every item that went into the outfit. The best outfit we found put up in a cheap, common box, **while ours goes into a handsome, stained, hinged tool chest.**

OUR BIG $2.00 OUTFIT is the only thoroughly reliable and practical outfit on the market for repairing of boots, shoes, harness and tinware, all high grade, standard tools and furnishings.

EVERY ARTICLE contained in this outfit is the best money can buy; suitable for the best shoemakers', tinners' and harness makers' use. We guarantee each and every tool to be of the best quality and to give the best of satisfaction. The tools are made by the best manufacturers of the highest grade of tools. The outfit is not composed of worthless cast iron hammers, worthless riveters, knives that will not keep an edge, soldering irons too light to hold the heat and do the work. It is put up on honor, containing only carefully selected tools of the highest standard offered in any combination outfit.

Rip-Proof Brand OVERALLS, WORKING PANTS, JUMPERS AND JACKETS OF ALL KINDS

THE CELEBRATED "RIP-PROOF" BRAND OVERALLS have won for themselves, on their merits, the reputation as the best overalls made. There are many overalls on the market under brand names in imitation of our "Rip-Proof" brand, but none of them equal in quality, as a comparison will prove. We manufacture them ourselves from cloth that are made expressly for us according to our own quality specifications, which we insist on various strength and wearing tests. They are all sewed on specially constructed lockstitch machines, which insures seams that are absolutely ripproof. Attached to each garment you will find our guarantee tag like facsimile shown here. This guarantee says that if any seam in the overalls rips, they may be returned to us and we will give a new pair free in exchange. We have also originated the idea of making all pants style overalls with side buckles and straps so that they can be worn without suspenders by simply pulling the straps tight.

Rip-Proof Brand

Every garment is sewed on a lockstitch machine and we guarantee against ripping, even with the hardest kind of wear. We will give a new pair free in exchange if any seam rips.

SIZES OF OVERALLS AND JACKETS: Jackets run from 34 to 46 inches breast measure, overalls from 30 to 44 inches waist measure, and from 30 to 36 inches leg measure from crotch to heel. We do not carry larger sizes in stock. If your breast measure is larger than 46 inches, or waist larger than 44 inches, or your leg longer than 36 inches, we will make garments to special order at an extra charge of 15 cents on all garments under 50 cents in price, and at an extra charge of 25 cents on all garments of 50 cents or over. If you want overalls in a size larger than 44 inches waist, and longer than 36 inches leg, we charge double the extra charges mentioned above. That is, we make a separate extra charge for the larger waist and for the longer leg. When ordering give your breast measure for jackets and waist and inseam measures for overalls. In writing your measurements in your order, give them like this: Breast 38, waist 34, leg measure 32. Please don't just give the figures, because we cannot tell which figures represent breast, waist and leg. Full measuring instructions are given on page 663.

This illustration shows the suspenders that go with each and all of our Men's Apron Overalls with the exception of Nos. 41F714, 41F739 and 41F743. It consists of a metal cross piece with 5-inch cord ends and elastic in back which adjusts itself to the movements of the body, just like regular suspenders. This is a feature seldom found in overalls sold elsewhere.

Our Ready to Wear Clothing Fits Without Alterations

"The style, fabric and workmanship in the suit purchased from you were entirely satisfactory and at least 50 per cent better than I could have secured for the same money at the clothing stores here. What pleased me most, however, was the fact that the fit was completely satisfactory the very minute I took the suit out of the box and put it on. It was actually ready to wear. The size I require is a little out of the average. Buying clothes at the home stores has always proved a disagreeable experience. I have been compelled to try on one suit after another until my patience was taxed to the limit, and even then was never able to secure a suit that did not require alterations of some kind. After being altered the fit was never completely satisfactory, and the style and shape never as good as they were before the garments were altered. With your system of sizes I have been able to secure from you a suit of perfect fit, shape and style without any try-ons or alterations, thus saving me a great deal of fuss, as well as time and money. It is pleasure and satisfaction to order clothing from you."

As this customer puts it, "Our clothing is actually ready to wear," and the reason is this:

Our system of sizes includes ninety-eight different sizes and proportions which our long years of experience have proven to be, with very few exceptions, the sizes that most men require. There are over four times as many compared with the sizes in which most ready made clothing is furnished, the average being about twenty-four. We furnish four sizes to every one size carried by the average clothing store. Our sizes are as follows: Every breast size from 34 inches up to and including 44 inches, with all "in between" sizes, 35, 37, 39, etc.; every waist size from 32 inches to 42 inches; every inseam size from 30 inches to 36 inches, and each size in three proportions—average, short and stout, and tall and slender. We select a suit that conforms with your exact breast, waist, sleeve and inseam measurements, and your height, and weight, thus insuring you a fit without alterations.

About Shipping Clothing by Mail.

Full information about freight and express shipments is given on page 13 of this catalog. We do not recommend having men's clothing shipped by mail unless you find it to your advantage to have it shipped that way. Packages weighing more than 4 pounds cannot be shipped by mail. The postage rate is 1 cent an ounce or 16 cents a pound. Suits weighing over 4 pounds can be divided into several packages, each weighing less than 4 pounds, and thus be shipped in separate packages. When mail shipment is wanted be sure to mention it in your order and allow extra money for postage.

We Guarantee Satisfaction or Money Returned.

We assume all risk of the clothing pleasing and satisfying you. All clothing you order is sent to you with this distinct understanding and agreement: The style and quality must be exactly as represented by us and must please and satisfy you; the fit must be perfect. If you have but the slightest fault to find with either, it is your privilege to return the unsatisfactory goods to us at our expense, and according to your wishes we will either exchange it for clothing that will be satisfactory or we will return all of your money, together with any amount you have paid for transportation charges. Please remember, too, that if you should have any fault to find with the clothing due to some error that you might have made in making out your order, we would not ask you to keep the clothing because the mistake happened to be made on your part, but we give you the same privilege of returning it to us either for exchange or return of your money. This guarantee protects you fully.

OUR CLOTHING IS MADE WITH THE NEW PATENT BARTELL POCKETS.

You have probably heard or read a great deal about these new patent pockets. Widely advertised everywhere and looked for by all careful dressers. They are a great improvement over the old style pockets. Articles of weight and bulk can be carried in them without any danger of sinking, sagging and sloping or spoiling the symmetrical shape of the coat fronts. From your experience you know that the old style pockets would be apt to have these faults. Many men who are particular about the shape and appearance of their clothing have made it a practice not to use the pockets of their coats at all, thus turning them from things of utility into practically nothing better than ornaments. The new patent Bartell pockets are made for real use. Carry newspapers, books or any other articles in them without any danger of the coat fronts being puckered, crumpled or pulled out of shape. The pockets will stay straight and trim from the day you start wearing the coat until the day you stop wearing it. All of our suits have the new patent Bartell pockets.

48c For a Complete Set of Our Patent Coat and Pants Hangers

When ordering a suit, overcoat or other clothing from this catalog be sure to include a set of these inexpensive, yet very practical, coat and pants hangers. They will save tailors' bills and make your clothes closet hold more. The set consists of two coat hangers, two pants hangers and one door rod. Coat hangers are made with black japanned metal bar and center piece, with wide strip of white tape extending from one end of lower bar over the center piece to other end. The tape being pliable permits the hanger to shape itself to the garment, also enables it to be folded up so as to take up little room in any traveling bag. Pants hangers are made of wood and metal and are fastened to the bottom of the trousers as shown in illustration. Door rod is made of solid metal, heavily nickel plated.

The illustration shows a simple device to be used in connection with the coat hangers, which anyone can make at home with a small piece of board and a few screw hooks. Take a piece of board about 4 inches wide and 1 inch thick, cut it in length to conform with the width of clothes closet from one wall to the other, and place it across the middle of the clothes closet, as shown in illustration. By using our coat hangers in connection with this device, you utilize the space ordinarily wasted for hanging anywhere from six to a dozen coats, overcoats, clothes, etc., as well as preserve their shape and prevent them from becoming wrinkled, which is usually the case when they are hung on hooks along the walls of the clothes closet with various other clothing piled on top. In a very short time one of these sets will save you the price of many sets.
